From the Boys "Over There."

SOMEWHERE WEST FRONT.
Sept. 27, 1918.

DEAR FRIEND:

As I have finally recovered enough,
I will write you just a few lines.

We went through a series of hard
struggles, working day and night,

through the wet and rain, and a big
majority of us were made sick.

I was in bed five days and am now
hardly able to be up, but am some
better.

You mentioned in your last letter
that you would like to make the trip
"over here," but if you knew what I
know now you certainly would change
your mind. No one can half realize
the situation over here until they have
seen it for themselves, and believe me
I have seen more than my share in the
past few weeks.

I would have liked to have been
there for the dance on the 25th of Au-
gust, but the chances we have for pleasure
for a long time to come is not very
promising. I suppose you read in the
papers that our boys are doing the
work at the present, but judging from
all we can learn our goal is still in the
very far distance.

Has it ever rained at home? It has
rained here every day and night for
about forty days.

I saw Julius Haby yesterday, being
the first one of the boys that I have
seen in two months. He said they are
all well, and that everything was just
about the same.

As I am still awful weak I will close
for the present. Tell your sister hello
and tell her if I happen to see Henry
I will certainly tell him.

With best wishes,
ALEX G. WENDLAND.

Field Hospital 360, 315 San. Train
American Exptd. Force,
September 27, 1918.

MR. AND MRS. ED. WURZBACH:

Just received your two letters and
will now try to answer them. I am
well and hope you are the same. Also
had a letter from mama today which
she wrote on the 27th of August. I
wrote to her yesterday. You can tell
her that I got her letter. Had a letter
from Ida B. day before yesterday; I
answered it this morning.

Looks like it never will rain out
there; we are having lots of it here.

I am not doing much of anything.
The four field hospitals that were at
Travis are not far apart and we work
at every one—they change us to just
where they need us. I and several
other boys of this company were at
one of them last night but did not have
much work.

Do Joe H.'s folks ever hear from
him? Some of our boys saw him some
time ago but I never got to see him.

I have not seen the kaiser yet but
have seen lots of his soldiers when they
brought them in as prisoners. I saw
Elmer about a month ago. I did not
have a chance to speak to him; don't
know where he is at now.

How many of the boys had to register
in September? I guess they got
most of the boys around home.

We are not living in the barns now;
we have moved about six times since I
wrote you last.

I have not learned to speak French
yet. There are not many people living
here; it is too close to the firing line.
We can hear the guns all the time when
they are firing. I saw one town that
was shot up. Two bombs went through
a church but did not explode. They
still have the bombs in the church. I
went in to look at them. They are
still using the church, but most of the
people have left the town.

It is cool here all during the day.
We wear our coats most of the time.

They have put several of us wagon-
ers back to first class privates since we
got rid of our mules.

Don't get mad if I don't answer all
your letters. I may not have any
news.

My paper is getting short so I had
better quit. You said something about
sending me a package. It might get
here and it might not, so you can use
your own judgment.

I sent some souvenirs home. Did
they ever get them?

Your brother,

Pvt. 1st class J. J. HABY,
Field Hospital 350, 315 San. Train,
A. P. O. 770, A. E. F., via N. Y.

SOMEWHERE IN FRANCE,
Sept. 21, 1918.

DEAR SIS:

You can never know just how
glad I was to get your good letter a few
minutes ago. It would have been a
cure for the blues had I had them.

One time you tell of those "lasses,"

the next time of "water melons and
turkeys;" my mouth just keeps watering.

Don't think of sending me anything
though for I am well fed. I'd
like to think that I'd be back for that
Xmas dinner, but do not look for me
until I am there for my train might be
delayed. The day I set foot again upon
the streets of Cliff will be marked a
great day upon my life's calendar.

I am afraid I won't know Ernest
and Hazel any more for I am sure they
have grown very much.

What shall I say about dear old dad-
dy? Tell him that the best news that
his strong-headed son can hear from
home is that he is in better health than
ever. Dear mother, watch her; don't
let her work too hard, and tell her that
I have allotted some money to her, be-
cause I don't need much over here,
and I may need it when I get back to
the U. S. A. some day.

Daddy must have heard of these
large clocks they have over here; they
have about half a dozen in each little
village, striking every fifteen minutes.

Old Ben is still with you all. Tell
him that some of his compatriots are in
my company.

It hadn't rained yet. Well it is
pretty dry over here, but it looks very
much like rain over here this evening.
I hope it rains enough to settle the
dust for tomorrow's drill.

I am some busy at times—don't have
time to wash my clothes or even write
a letter. The last letter I wrote you I
wrote in such a hurry that a minute
after I had mailed it I couldn't think
of what I had written. Now if you
fail to get any news from me for a
time remember that I haven't many
leisure hours. Mail is pretty slow now
and for that reason I write a little
ahead of time once in awhile. I have
been over here some time but can't
realize being so far from home. The
other day some of the boys were sit-
ting and talking about it and it seemed
all a dream.

Now I must bid you goodbye with all
the passionate love of a soldier boy for
his loved ones at home.

Pvt. RAYMOND SCHUCHART,
Co. E., 145 Infantry American Ex-
peditionary Forces.

Notice.

Our entire ranch is posted according
to law. Hunting is strictly forbidden.
Any hunting privilege granted
heretofore is at present null and void.

Oliver Grant Dead.

Oliver Grant died at Camp Travis
last week, being the first colored boy
from Hondo in service to die. He was
just on the threshold of manhood, hav-
ing just entered his 22nd year. He
leaves a mother and father and one
sister and many friends and relatives
to mourn his loss. May God comfort
the mourning ones.

FRANK PIERCE.

Scalding Pots. Holloway Bros.

Miss Albertina Hornung is here from San Antonio on a visit to her parents, Mr. and Mrs. August Hornung. She will spend a couple of weeks here recuperating from a recent severe attack of influenza.

H. E. Haass, Attorney at Law, Surveyor's Office, Courthouse, Hondo, Texas. All legal matters carefully attended to, in all courts of Texas. Manager Medina County Abstract Co.

Miss Olga Heyen, the popular teacher of the Seco school, was a pleasant caller here Wednesday. The Seco school has been closed for the past two weeks on account of the Spanish influenza.

Jos. Conrad, one of the irrigation farmers of Lacoste, was in Hondo on business Wednesday and was an appreciated caller at this office. He was accompanied by his nephew, Master Oswald Keller.

Mrs. J. G. Newton was reported critically ill at Kingsbury this week where she was called on account of the illness of her mother. At last accounts, we are pleased to state, she was convalescent.

R. E. Bohmfalk was in town Monday and called around at this office to renew his own subscription and to have the Anvil Herald sent to his daughter, Miss Jane, who is taking a course in nursing in San Antonio.

The death of Chas. M. Conover, the only son of Mrs. T. M. Conover, 116 Fannin street, will cause profound sorrow to a large circle of friends in Medina county. The deceased was born in Castroville June 28, 1886, and consequently was 32 years old at the time of his death, which occurred in San Antonio October 25th.

The body of Robert E. Buckner, who died at Selma, California, passed through here last Sunday en route to Tarpley for interment. He was a native of Bandera county but moved with his family, some months ago to California. He fell a victim to influenza. His entire family was down with the malady at the time of his death.

The school children of Medina County that have been collecting fruit pits and nut shells should turn their collections over to the Local Red Cross Organizations in their respective communities. This work is being carried on by the American Red Cross. The Food Administration has merely been aiding in giving the enterprise publicity.

W. N. SAATHOFF,
Food Administrator.

"Coyote Club" Organized.

Dunlay, Tex., Oct. 27, 1918.

The Farmers' Union of Medina Co. met with the Quihi Local Oct. 19, 1918. The president, H. F. Wurzbach, called the meeting to order, and although the crowd was small some very interesting subjects were brought up for discussion. The following are some of the resolutions acted upon:

Resolution No. 1. Whereas the present dove law has no fine attached to it therefore dove season having been open since Sept. 1.

Therefore be it resolved that the F. E. & C. U. of Medina Co. ask for a law to be made by the next Legislature to make the open season for doves to be from Dec. 1st to Feb. 1st, and any violation by killing, keeping, or otherwise, to be punishable by a fine of \$25.00 for each offense.

Resolution No. 3. Whereas the coyotes are killing many goats, chickens, etc., causing a loss of thousands of dollars annually to the farmers and stockmen of Medina Co.

Therefore be it Resolved that we, the F. E. and C. U. of Medina Co. urge the organization of Coyote Clubs, to be organized, one in each school district; the members to pay ten cents each in advance for every coyote killed by the member in the school district, and only paid-up members are to receive a bounty.

After some other things were brought up the meeting adjourned to meet again at the New Fountain schoolhouse and have a public meeting at 2 o'clock p. m. Nov. 9, 1918.

The resolutions should be taken up in every school-district, children should be asked how late in the year they can find dove nests with eggs or little ones, and then report the same to their representatives at Austin.

As to the Coyote Club, the Quihi school district organized with 15 members and others are joining right along.

The Quihi Coyote Club will pay to its members the same for the wild cat as for the coyote.

Let us all organize and do something in these lines. It is pure democracy.

S. H. SAATHOFF.

GIVE "SYRUP OF FIGS" TO CONSTIPATED CHILD

Delicious "Fruit Laxative" can't harm tender little Stomach, Liver and Bowels.

Look at the tongue, mother! If coated, your little one's stomach, liver and bowels need cleansing at once. When peevish, cross, listless, doesn't sleep, eat or act naturally, or is feverish, stomach sour, breath bad; has sore throat, diarrhea, full of cold, give a teaspoonful of "California Syrup of Figs," and in a few hours all the foul, constipated waste, undigested food and sour bile gently moves out of its little bowels without griping, and you have a well, playful child again. Ask your druggist for a bottle of "California Syrup of Figs," which contains full directions for babies, children of all ages and for grown-ups.

Quihi Notes.

Oct. 31, 1918.

A small rain fell here Friday afternoon, which makes everything look nice and fresh again.

Jacob Schweers and little son, Clarence, passed by here Saturday with a large bunch of cattle en route to their ranch up at the Verde.

Ernest Boehle and George Saathoff of Verdina City were sporting here Sunday.

Mr. and Mrs. B. H. Brucks spent Sunday with Mr. and Mrs. Jacob Oefin ger and family.

Rolf and Alfred Saathoff of Green Hill were seen on our streets Sunday. Come again, sports.

A. J. Rohlf of Verdina City passed by here Monday en route to Sturm Hill where he hauled several bushels of corn with his new trailer.

Miss Bertha Boehle, Messrs. Joe and Ernest Boehle, Walter Brucks, Alfred Breiten and Charlie Lindeburg spent Sunday with Mr. and Mrs. Henry Loesberg and family.

H. H. Saathoff hauled a truck-load of goods from San Antonio Tuesday.

Mr. and Mrs. E. A. Balzen of here spent Sunday with Mr. and Mrs. Albert Eckhardt and family at Sturm Hill.

Henry Saathoff, Sr. of Bandera was here on business Monday.

Ernest Grell and Alfred Boehle enjoyed a truck-ride to Hondo Sunday.

E. A. Balzen was repairing a Dodge car for Fritz Balzen of Sturm Hill last week.

John Bohlen was here on business Tuesday evening.

Ed. Schulte was shopping here Tuesday evening.

E. W. Balzen and Christ. Fuos stopped here on business Tuesday evening after coming from Hondo.

Walter Brucks and Alfred Breiten spent Wednesday evening with Boehle Bros.

A Red Cross meeting was held here Wednesday evening. It was well attended.

Come over to the Quihi Gun Club meeting Sunday, Nov. 3, and have a Tango.

TWIN SISTERS.

State Department Man Spoke in Wortham.

A fair sized crowd of farmers and several ladies listened for an hour to a lecture on co-operation and marketing of farm products at the tabernacle Saturday afternoon by Fletcher Davis, Field Agent of the State Department of Agriculture.

Mr. Davis told why he was present, because the law requires that the Commissioner of Agriculture send men to the various communities to conduct such meetings. He said that the statesmen that created the Department and made this one of the duties of the Commissioner did so because they realized that it is easier to reach and serve an organized body than it is to reach and serve the individual units of an unorganized mass. He said the nature of the American farmer's environment and education has made an individualistic creature of him and that he yet has the lesson of how to organize and co-operate to learn.

Mr. Davis told why the American farmers get only 42 per cent of what the consumer pays for farm products while the Belgian farmer was getting 93 per cent before this war laid that country waste, lies in the fact that the American farmer has not learned, as has the Belgian farmer, the lesson of organization and co-operation.

"For instance," said the speaker, "could a number of Belgian farmers have exchanged places with you this season, can you think of them accepting \$63 a ton for their cotton seed when by pooling them and delivering them to the mills through their authorized agent they could have just as well received \$66.00 per ton?" Instead of accepting the dealer's price of \$63.00 per ton, and playing dominoes while the gin man blew the seed into a seed house, and then driving an empty wagon to the oil mill and loading up with meal and hulls at retail prices, the speaker thought the Belgian farmer would have caught his seed, hauled them to the mill and delivered them through his agent at the higher price and bought his meal and hulls through his agent and saved whatever difference may be between wholesale and retail prices. It is by such means as this that the Belgian farmer's produce is transported and distributed to the consumer at a cost of only 7 per cent of consumer's cost of produce while it takes 58 per cent to render the same service in America.

Mr. Davis dealt at some length with the cotton market. He showed how for years future gamblers have manipulated the market so as to separate the farmer from his product at below the cost of production and how the south is suffering poverty and increasing tenancy as a consequence. He counseled the whole people, farmers, bankers, merchants, and all, to stand together for at least cost of production, which he said is 35 cents a pound for this year's crop.

The speaker was given close attention throughout his discourse and many expressed themselves as endorsing what was said.—Wortham Journal, Oct. 31, 1918.

The speaker was given close attention throughout his discourse and many expressed themselves as endorsing what was said.—Wortham Journal, Oct. 31, 1918.

SATURDAY, NOVEMBER 2, 1918.

Agriculturist Speaks.

Last Saturday evening Mr. Fletcher Davis, field agent of the State Department of Agriculture, spoke in the Rustler building to an appreciative crowd of our farmers.

He first took up the handling of cotton seed and showed that organization was the way to get the best results.

He next took up the marketing of cotton and showed the various ups and downs of the staple for several years, and showed conclusively that the gradual marketing of the staple was the best way to get a fair price for it. He also showed that cotton was now selling too cheap, that when cotton was selling at 4 cents, corn was selling at 13 cents a bushel and that it then took three and one-fourth pounds of cotton to buy a bushel of corn, whereas now with cotton at 35 cents a pound and corn \$2 a bushel it now takes about five pounds of cotton to buy a bushel of corn.

His speech was attentively received and was a forceful argument. A great many of his hearers asked that bulletins be sent them.—Rice Rustler, Sept. 27, 1918.

Irregular bowel movements lead to chronic constipation and a constipated habit fills the system with impurities. HERBINE is a great bowel regulator. It purifies the system, vitalizes the blood and puts the digestive organs in fine vigorous condition. Sold by W. H. Windrow.

AMENDED RULES ON GREEN COFFEE.

The Food Administration has amended the regulations governing green coffee. Hitherto the dealer has been permitted to average spot coffee with coffee in transit or which he had arranged to ship from the country of origin. The new regulation is as follows and changes Rule 1:

Rule 1: Licensees entitled to reasonable profit. The licensee in any sale of green coffee shall take no more than a reasonable profit over the cost of the particular coffee sold, provided that any sale of spot coffee shall be made at not more than a reasonable profit over the average cost of his entire stock of spot coffee. Each growth of coffee shall be averaged separately. This amendment applies to all sales made after September 11, 1918.

Neuralgia of the face, shoulder, hands, or feet requires a powerful remedy that will penetrate the flesh. BALLARD'S SNOW LINIMENT possesses that power. Rubbed in where the pain is felt is all that is necessary to relieve suffering and restore normal conditions. Sold by W. H. Windrow.

Stop coughing! You rack the lungs and worry the body. BALARD'S HOREHOUND SYRUP checks irritation, heals the lungs and restores comfortable breathing. Sold by W. H. Windrow.

H. L. MILLS MEMBER OF FIELD SUPERVISION FOR FOOD ADMINISTRATION.

H. L. Mills, associate director of education of the Federal Food Administration for Texas, has been designated by Administrator Peden as member of the staff of Field Supervision, with headquarters in Houston, and hereafter will devote his time to matters of investigation of complaints and assist in checking of licensees and unlicensed dealers to see that the rules and regulations are being observed. Mr. Mills, in coming to the Food Administration permanently, surrenders his work as principal of the Fullerton School, Houston, and sacrifices a much better paying position to render special service for the government.

During the summer months Mr. Mills handled the school and Speakers' Bureau of Educational Department and made a splendid record in not only organization, but getting the message of the Food Administration before the school teachers of Texas.

INFLUENZA WORSE THAN HUN BULLETS.

Claiming More Victims Than Battle Fronts of Europe—Disease Can Be Avoided.

According to carefully compiled statistics it is an indisputable fact that the Spanish Influenza Epidemic which is now sweeping all parts of the country is daily claiming far more victims than German bullets on the battle fronts of Europe. Although civil and military authorities have succeeded in checking the disease in some localities, it is growing worse in others and continues to spread at an alarming rate. That the disease can be avoided there is no longer any doubt. According to leading authorities the powers of resistance of the human system can be so perfected that it can throw off almost any infection, not even excepting Spanish Influenza, which is one of the most contagious diseases known.

It is persons who are suffering from lowered vitality, who are weak and rundown and who have not the strength to throw it off who are the earliest victims. Persons who have bad colds, who are suffering from catarrhal troubles, or inflammation of the mucous membranes are especially susceptible, as the inflamed mucous membrane linings of the nose and throat are an open door to the germs. This condition is almost always accompanied by a weakened condition of the system.

If you are suffering from any of these symptoms, nothing on earth will build you up and strengthen you like Tanlac, which contains the most powerful tonic properties known to science.

This statement is easily proven by the fact that Tanlac is now having the greatest sale of any system tonic in the history of medicine. In less than four years time over Ten Million Bottles have been sold and the demand is constantly increasing. Thousands are using it daily for the above troubles with the most astonishing and gratifying results.

Tanlac increases your strength and weight and creates a good, healthy appetite for nourishing food. It keeps you physically fit and helps every organ of the body perform its proper function in the natural way.

In connection with the Tanlac Treatment be sure and keep the bowels open by taking Tanlac Laxative Tablets, samples of which are included in every bottle.

Tanlac is sold in Hondo by W. H. Windrow.

SUGAR FOR USE IN TEACHING CANNING.

The question has been asked the Federal Food Administration for Texas by various persons whether schools teaching Home Economics will be provided with sugar for lessons in canning at the opening of the school year, when these lessons are usually given. Administrator Peden is assured by the Sugar Division of the U. S. Food Administration that this sugar will be provided through the usual channels of sugar distribution.

This means that persons wishing to purchase sugar for teaching canning in departments of Home Economics of our schools and colleges, may apply to the Food Administrator for each quantity as they need for that purpose. It is urged, however, that teachers will make it a part of instructions to can with no sugar, or with little sugar, and with substitutes.

Put a porous plaster on the chest and take a good cough syrup internally if you would treat a severe case of sore lungs properly. Get the dollar size BALLARD'S HOREHOUND SYRUP. With each bottle there is a free HERRICK'S RED PEPPER POROUS PLASTER for the chest. Sold by W. H. Windrow.

Many Seem to Think So.

Like everybody else, the paragrapher has his dull days, though, perhaps, the rest of the people feel that the paragrapher has more of them than anybody else.—Wilmington News.

Regulate the bowels when they fail to move properly. HERBINE is an admirable bowel regulator. It helps the liver and stomach and restores a fine feeling of strength and buoyancy. Sold by W. H. Windrow.

A NATION'S STRENGTH IS IN ITS FOOD SUPPLY

Eat Less — Waste nothing
Create a Reserve

AMERICA MUST FEED 120,000,000 ALLIES

No Worms in a Healthy Child

All children troubled with worms have an unusual color, which indicates poor blood, and as a rule, there is more or less stomach disturbance. GROVE'S TASTELESS CHILL TONIC given regularly for two or three weeks will enrich the blood, improve the digestion, and act as a general Strengthening Tonic to the whole system. Nature will then throw off or dispel the worms, and the child will be in perfect health. Pleasant to take. 60c per bottle.

CASTROVILLE, OCTOBER 31, 1918

ED. HUEHNER, LOCAL REPRESENTATIVE

News or business matter for this page for the week's issue should be submitted to Mr. Huehner or mailed direct to us at Hondo not later than Wednesday night of each week.

Frank Bohl, Sr., died at his home here early Wednesday morning and was laid to rest at the Cath. Cemetery on Thursday morning. Rev. Father Heckman performing the last sad rites. Deceased was born at Garbweiler, Alsace-Lorraine, Sept. 29, 1834, and came to this country in 1845. During the year 1884 he was happily married to Miss Philomina Iltis. This union was childless. In the early seventies deceased served as a Texas Ranger in Company E, in command of Capt. H. J. Richards, stationed at Fort Inge. A good man has gone to his last reward. Deceased leaves his aged and grief-stricken widow, two brothers, Anton and Ambrose Bohl of the Lacoste neighborhood, and four sisters, Mesdames Jacob Becker of Macdona, Mathias and John Jungman of Lacoste, and F. Jos. Biediger of Lower Medina, and a large number of other near and dear kith and kin to mourn his loss. A large concourse of mourning relatives and friends followed the remains to their last resting place. We join this entire community in sympathy with the bereaved and grief-stricken ones. R. I. P.

Miss Lizzie Kilhorn is visiting relatives at Riomedina this week.

Mrs. Alois Haby of Red Wing was shopping here this week.

Miss Emma Fuos has returned home after a lengthy stay with relatives in San Antonio.

Chas. Wurzbach and daughter, Miss Edna, were here from the ranch shopping Monday.

Born, to Mr. and Mrs. Alfred Rihn, a daughter, Thursday, October 24, 1918.

Mrs. Louis Mangold is spending the week with Mr. and Mrs. Willie Keller in Lacoste.

Mr. and Mrs. Joe Keller, who were sick with influenza, are both able to be up again.

Misses Rosa Mangold, Lizzie Kilhorn and Leonard Mangold were at Lacoste Sunday.

Misses Lucille Tschirhart and Gussie Groff came out from San Antonio to visit relatives this week.

Adolph Holzhaus was here Sunday from Elmendorf after his car which he had here for repairs.

Mr. and Mrs. Edmond Keller were here from Lacoste during the week.

Mr. and Mrs. Albert Kempf, Jr., moved from the Haess place, near Noonan, to the Rihn farm below town.

Mrs. Rosa Biediger is visiting at Riomedina this week.

Mr. and Mrs. Willie Ney and two children of San Antonio visited Mesdames Henry Steinle and Robert Rihn here Monday.

Mr. and Mrs. Adolph Wurzbach were here from Cliff Sunday.

Jack Stein was here from Cliff Friday.

Mrs. Leo Tschirhart is in Lacoste nursing her daughter, Mrs. Joe Hans, this week.

Emil Schott and daughter, Octavia, were here from Red Wing Monday.

Born, to Mrs. and Mrs. Henry Kaufman of Lacoste, a daughter, Sunday, Oct. 20, 1918.

Mrs. Adam Drotcourt spent several days at Pearson this week.

RECEIVING WAR CROSS

Results With Intensive Farming.

(Fletcher Davis, Field Agent, State Department of Agriculture.)

Four crops from the same soil in one season without fertilizer shows the fertility of some Texas soils and what can be done with it under intensive methods and by aid of irrigation.

On February 20, 1917, Mr. Frank Denton, on the S. A. Strong farm near Eagle Lake, planted an acre to Irish potatoes. The land was grass sod that had been planted to Sudan grass for two consecutive seasons since any fertilizer had been applied. A hundred bushels were harvested the last of April from this acre. Eighty bushels were sold on the market for something over a hundred dollars and 20 bushels were consumed by the family.

As soon as the potato crop was off the land it was planted to cowpeas. A considerable quantity of green peas were gathered from this acre for family consumption and sold on the local market. The chief use made of the cowpeas, however, was to feed to livestock as a soiling crop. It is estimated that two tons of feed of a value of \$40 was produced from this acre of cowpeas.

The land was cleared of the cowpeas in August, and the latter part of that month planted to the second crop of Irish potatoes. The second crop of potatoes was light, but yielded a supply for family use for some time.

After the potatoes were harvested the land was planted in turnips and yielded a crop of \$50 estimated value.

This acre was irrigated along with some other crops, by an eight horse-power gasoline engine driving a three-inch American centrifugal pump pumping from a 40-foot well. The prorata cost for irrigating the acre was very little, and the returns show what can be done under intensive methods of cultivation.

Mr. F. A. Bruhl, father-in-law of the young man who did this, and the gentleman to whom the writer is indebted for the information, is of the opinion that it can be duplicated on any farm where facilities for irrigation are adequate, and says that the neglect to do so is often the cause for failure on Texas farms where success would otherwise crown the farmer's labors. He is of the opinion that the farmer who has facilities to irrigate fall food and feed crops and fails to utilize those facilities to the utmost, is without a due regard for the world's food crisis at this time if not lacking in the proper spirit of patriotism.—Farm and Ranch, Oct. 5.

Fletcher Davis of Hondo, field agent for the State Department of Agriculture, was in Teague Friday and Saturday. A Farmers' Institute was to have been held in Teague Friday and a Farmers' Union meeting Saturday afternoon. It was Mr. Davis' intention to meet with both these farmers' gatherings. The Spanish influenza epidemic, however, caused both of them to be postponed until a later date. Being a newspaper man, and having a natural "hankering" for a newspaper office, Mr. Davis called at the Chronicle office, and presented his card, the introduction of which runs something like this: "I wish to get acquainted with every man and his methods who has succeeded with anything—to learn from him how to succeed. I want to meet every man who has failed in anything—to learn how to avoid his failure. Maybe you can learn something from me. Let's get acquainted." Mr. Davis is a forceful speaker and is fully imbued with the work of the department. His return visit, which we hope may not be far distant, will be a very welcome one. Next visit he hopes to meet with more of the farmers and consequently do more good in his line of the work.—Teague Chronicle, October 18, 1918.

Chamberlain's Cough Remedy. Do not imagine that because other cough medicines failed to give you relief that it will be the same with Chamberlain's Cough Remedy. Bear in mind that from a small beginning this remedy has gained a world wide reputation and immense sale. A medicine must have exceptional merit to win esteem wherever it becomes known.

Where Prince Max erred was not in writing it "the ex-imperial government" of Germany. Then we'd have known what he meant.

About Croup.

If your children are subject to croup, or if you have reason to fear their being attacked by that disease, you should procure a bottle of Chamberlain's Cough Remedy and study the directions for use, so that in case of an attack you will know exactly what course to pursue. This is a favorite and very successful remedy for croup, and it is important that you observe the directions carefully.

Greatly Benefited by Chamberlain's Tablets.

"I am thankful for the good I have received by using Chamberlain's Tablets. About two years ago when I began taking them I was suffering a great deal from distress after eating, and from headache and a tired, languid feeling due to indigestion and a torpid liver. Chamberlain's Tablets corrected these disorders in a short time, and since taking two bottles of them my health has been good," writes Mrs. M. P. Harwood, Auburn, N. Y.

The fact that the cook can sleep an hour later these mornings doesn't make much difference—she didn't get up till she got ready, anyhow.

SPANISH INFLUENZA

Manifested by Catarrhal Condition

With the first signs of Spanish Influenza, well to consult your physician as that is not the disease that is to be feared, much more is the condition which may follow.

To ward off Spanish Influenza or any returning health attack, nothing is better than Dr. Mann's World Famous

For Catarrh of Every Description Take PE-RU-NA

CALLED HER FAMILY TO HER BEDSIDE

Six Years Ago, Thinking She Might Die, Says Texas Lady, But She is a Well, Strong Woman and Praises Cardui For Her Recovery.

Royse City, Tex.—Mrs. Mary Killman, of this place, says: "After the birth of my little girl...my side commenced to hurt me. I had to go back to bed. We called the doctor. He treated me...but I got no better. I got worse and worse until the misery was unbearable...I was in bed for three months and suffered such agony that I was just drawn up in a knot...continued right on taking the bottle until I had taken three bottles. I did not need any more for I had never felt better in my life and never felt better in my day to this."

Do you suffer from headache, pain in sides, or other aches, each month? Or do you feel weak, nervous and fagged out many days unless I had a change for trial.

Calomel Today! Sick Tomorrow!

I Guarantee Dodson's Liver Tonic

Don't take nasty, dangerous calomel when bilious, constipated, headache. Listen to me!

Calomel salivates! It's mercury. Calomel acts like dynamite on a sluggish liver. When calomel comes into contact with sour bile it crashes into it, causing cramping and nausea.

If you feel bilious, headache, constipated and knocked out, just go to your druggist and get a bottle of Dodson's Liver Tonic for a few cents which is a harmless vegetable substitute for dangerous calomel. Take a spoonful and if it doesn't start

your liver and straighten it better and quicker than any medicine and without making you just go back and get yours.

If you take calomel today you will wake up feeling great again. It is harmless, please safe to give to children; they

NOTICE OF SALE

Of Real Estate Under Order of Sale, Issued Out of The District Court of Comal Co., Texas.

In Mrs. Rachel Landa Abrahams, vs. H. A. Jones and Lee Ward Sr., Number 1898.

Whereas, by virtue of an order of sale, issued out of the District Court of Comal County, Texas, on the 23rd day of October 1918, in cause No. 1898, entitled Mrs. Rachel Landa Abrahams vs. H. A. Jones and Lee Ward Sr., on a judgment rendered in said court on the 10th day of September 1918 in favor of Mrs. Rachel Landa Abrahams against said H. A. Jones and Lee Ward Sr., said judgment being in the sum of Twenty-one hundred and fifty-one dollars and eighty-three (\$2151.83) cents, with interest at the rate of eight (8) per centum per annum, from the 10th day of September 1918, and costs of suit amounting to twenty-three dollars and five (\$23.05) cents, and the additional amount of costs accruing in the execution of this writ, I did, on the 30th day of October, 1918, at 9:30 o'clock a.m., levy upon the following described property and land situated in Medina County, Texas, belonging to said H. A. Jones, to-wit: Situated in two (2) tracts of land aggregating about three (3) acres of land out of Survey No. 800, Certificate No. 246, Abstract No. 666, patented to Timothy Montier, and more particularly described as follows, to-wit: First Tract, Beginning at the N. W. corner of a tract of land of 186 $\frac{1}{2}$ acres sold to W. E. Newton by J. M. Kilgore, guardian, on the 9th day of May 1896 by deed recorded in Book "A", No. 28, page 278 of the deed records of Medina County, Texas, for the N. E. corner of this lot; thence W. 209 feet to a stake for the N. W. corner of this tract; thence S. 209 feet to a stake for the S. W. corner of this tract; thence E. 209 feet to a stake on the W. line of said Newton tract for the S. E. corner of this tract; thence North along the West boundary line of said Newton tract to the place of beginning. Second Tract: Beginning at the S. E. corner of a tract of land of one (1) acre sold to John Muennink and Fritz Faseler by J. M. Kilgore, guardian, on the 11th day of March 1899, for the N. E. corner of this tract; thence S. 244 feet to a stake for S. E. corner of this tract; thence W. 260 feet to the S. W. corner of this tract; thence N. 453 feet to the N. W. corner of this tract; thence E. 51 feet to a stake, the N. W. corner of the Gin Property, for the N. E. corner of this survey; thence S. 209 feet along the West boundary line of the Gin property to its S. W. corner; thence E. 209 feet to the place of beginning, the N. E. corner of this tract, said property lying in the town of Yancy, and being known as the Yancy Gin Property, and said property lying South of the City of Hondo in Medina County, Texas; and on the 3rd day of December, 1918, same being the first Tuesday of said month, between the hours of 10 o'clock a.m. and 4 o'clock p.m. on said day, at the court house door of said Medina County, Texas, in the City of Hondo, Texas, I will offer for sale, and sell at public auction for cash, all the right, title and interest of said H. A. Jones and Lee Ward Sr., in and to said property, and I will apply the proceeds of said sale; to the payment and satisfaction of said herein before described judgment.

Dated at Hondo, in Medina County, Texas, on this 30th day of October, 1918.
J. F. BADER,
Sheriff, Medina County, Texas.
By Wesley Favor, Deputy.

LEMONS WHITEN AND BEAUTIFY THE SKIN

Make this beauty lotion cheaply for your face, neck, arms and hands.

At the cost of a small jar of ordinary cold cream one can prepare a full quarter pint of the most wonderful lemon skin softener and complexion beautifier, by squeezing the juice of two fresh lemons into a bottle containing three ounces of orchard white. Care should be taken to strain the juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, whitener and beautifier.

Because of the continued dry weather and the imminence of a food shortage during the winter the cattlemen have recently been forced to place on the market large shipments of good heifers and cows and lightweight steers. Unless the public rallies to their support and consumes this class of meat, it is explained that the cowmen's market will be demoralized, resulting in great financial loss.

Only steers dressing over 435 pounds are accepted on government meat contracts, hence the use of lightweight beef in no sense affects the soldiers' supply. Mr. Williams explained. This beef is just as choice and wholesome as is the heavy stuff.

The official order in this connection issued by State Food Administrator Peden follows:

"Owing to the fact that Texas is a beef-producing State, and that there are many undersized cattle now being killed which are not being exported, the following plan for meat conservation should be used by public eating places, in place of the meat program outlined in bulletin H. R. 28, dated July 3:

"All restrictions as to the use of lightweight beef, dressing 435 pounds and under are hereby removed, effective August 10. Public eating places may serve lightweight beef at any meal and in any amount desired."

"All public eating places are requested to use only lightweight beef, but those hotels and restaurants that use heavyweight beef must be governed by the National beef program."

It does the work, use SANOL ECZEMA REMEDY to get rid of those Black Heads, Pimples, or Rough Bumpy Skin. Leaves skin smooth. Cures any case of Eczema. Is pleasant to use. A trial will convince you. 50c and \$1.00 at the drug store.

The Quinine That Does Not Affect the Head Because of its tonic and laxative effect, LAXATIVE BROMO QUININE is better than ordinary Quinine and does not cause nervousness nor Quinine in head. Remember the full name and look for the signature of E. W. GROVE, 30c.

DOING THEIR DUTY.

Scores of Hondo Readers are Learning the Duty of the Kidneys.

To filter the blood is the kidneys' duty.

When they fail to do this the kidneys are weak.

Backache and other kidney ills may follow.

Help the kidneys do their work.

Use Doan's Kidney Pills—the tested kidney remedy.

Proof of their worth in the following:

J. F. Gardner, Sabinal, Texas, says: "I have found Doan's Kidney Pills will do all that is claimed for them and take pleasure in recommending them publicly. My kidneys acted irregularly and I had pains through my back and sides. I heard about Doan's Kidney Pills and used some and they helped me wonderfully."

The above is not an isolated case. Mr. Gardner is only one of many in this vicinity who have gratefully endorsed Doan's. If your back aches—if your kidneys bother you, don't simply ask for a kidney remedy—ask distinctly for Doan's Kidney Pills, the same that Mr. Gardner had. 60¢ all stores. Foster-Milburn Co., Props., Buffalo, N. Y.

From Fort Sam Houston and Camp Travis.

On Monday morning there were no "yellow slips," the yellow slip indicating a death report, on the adjutant's desk at the Base Hospital, Fort Sam Houston, the first morning that such a condition existed since the beginning of the influenza epidemic. The hospital report showed only 19 new cases admitted and six cases of pneumonia developed. 71 men were returned to duty. The number in the hospital was reduced to 1507.

At Camp Travis, Base Hospital, only one death had occurred since midnight Saturday night. 147 new cases of influenza had been admitted, but all of these cases, with the exception of 15, had originated in the concentration camp where drafted men, recently sent into the camp, are being held in quarantine. 24 pneumonia cases had developed. The number of discharges numbered 215.

The number of patients in the hospital had been greatly reduced, there being 3722 on Monday as against over 7000 during the crest of the epidemic. The number of influenza patients in influenza concentration quarters was reduced to 1519, the greater portion of these men being convalescent and almost ready to be returned to duty.

(S. A. Light, Oct. 29th.)

USE OF LIGHTWEIGHT BEEF MAY EASE SITUATION.

As a patriotic contribution to the hard-pressed, drouth-stricken cattlemen of Texas, A. C. Williams, assistant secretary of the Cattle Raisers' Association of Texas, has issued a statement in which he urges all private consumers and owners of public eating places to use only lightweight beef on their tables. In this request he is joined by E. A. Peden, State Food Administrator.

The National Food Administration, at the urgent request of the association, has lifted the restrictions as applied to lightweight beef, and it can now be served three times daily, if wanted. By the term lightweight beef is meant cattle dressing 435 pounds or under.

Because of the continued dry weather and the imminence of a food shortage during the winter the cattlemen have recently been forced to place on the market large shipments of good heifers and cows and lightweight steers. Unless the public rallies to their support and consumes this class of meat, it is explained that the cowmen's market will be demoralized, resulting in great financial loss.

Only steers dressing over 435 pounds are accepted on government meat contracts, hence the use of lightweight beef in no sense affects the soldiers' supply. Mr. Williams explained. This beef is just as choice and wholesome as is the heavy stuff.

The official order in this connection issued by State Food Administrator Peden follows:

"Owing to the fact that Texas is a beef-producing State, and that there are many undersized cattle now being killed which are not being exported, the following plan for meat conservation should be used by public eating places, in place of the meat program outlined in bulletin H. R. 28, dated July 3:

PRICES FIXED ON COTTON SEED

NEW SCHEDULE ANNOUNCED FOR TEXAS BY ADMINISTRATOR PEDEN.

Administrator Peden, basing his figures on the stabilized program recommended by the representatives of the producers of cotton seed and accepted by the Food Administration, announces the following schedule on cotton seed and its by-products. This announcement supersedes all previous announcements or rulings which may be in conflict with it.

1. The State of Texas shall constitute five zones and the yields for these zones are as follows:

Zone No. 1	Zone No. 2	Zone No. 3	Zone No. 4	Zone No. 5	(35 Gals.)
(39 Gals.)	(38 Gals.)	(37 Gals.)	(36 Gals.)	(35 Gals.)	(35 Gals.)
297½	285	277½	262½	92½	
920	930	940	930	960	
540	540	540	540	540	
145	145	145	145	145	
100	97½	100	97½	100	
					2,000
Total					2,000

2. The price of all reasonably sound seed, irrespective of the actual output yield, shall be:

Carload Wagon Lots.

Zone No. 1..... \$68 \$65

Zone No. 2..... 67 64

Zone No. 3..... 66 63

Zone No. 4..... 67 64

Zone No. 5..... 64 61

f.o.b. any railway station in the State of Texas. The zone of origin of all cotton seed determining the price.

3. The price of seed at the landings on navigable rivers in which boats are actually operating shall be the same as the railroad basis price for bulk seed, to which may be added the current market value of the bags in which such seed are packed. This cost of bags shall be added only when bags are furnished by party selling the seed.

4. No deduction from the price will be permitted except for proven damaged or unsound seed. Proof of such damaged or unsound quality must be furnished to me. No deductions will be allowed for dirt or trash unless accompanied by sworn certificate (or actual written agreement with the seller) showing actual weight of such dirt or trash taken from each carload or wagonload and the name of the grower or dealer selling such seed.

5. To conserve the use of freight cars, cotton seed may be hauled from railroad stations to mill points and the seller may receive as compensation for such hauling an amount equal to the railroad freight for the same distance. This cost of hauling to be treated by the purchaser as freight on seed.

6. Seed from any point may be sold at the carload price, in quantities of 20 tons or more, for delivery by wagon within ten days.

7. Additional regulations on the handling of cotton seed will be found in circular No. 40 issued from Washington under date of June 14, 1918.

8. In handling this crop, it is expected that there will be a co-operative spirit on the part of all interests to the end that waste may be eliminated and conservation in every way be promoted.

MAXIMUM PRICE IS FIXED ON BREAD.

The Baking Division of the United States Food Administration, after making investigation of the manufacturing cost and wholesale and retail price for one-pound loaves of wheat bread, established a maximum retail price for one-pound loaf at 10 cents, one and half pound loaf at 15 cents. These are maximum prices for either cash and carry or credit and delivery, and should be enforced in each State.

Further investigation shows 8 cent and 12-cent wholesale price. In many sections these wholesale prices warrant a retail price of 9 cents for a pound loaf, and 14 cents for a pound and half loaf, cash and carry, and State Administrators have been instructed to arrange for distribution at these figures in as many places as possible.

GRAINS TO BE SENT ABROAD BY THE U. S.

Under the agreement entered into by the Food Administration with the food controllers of the allied nations, our breadstuffs export program for the coming year will be:

Wheat, rye, barley and corn, or flour calculated as grain for breadstuffs, 409,320,000 bush

YOUR CAST-OFF CLOTHING TO WARM BELGIANS IF YOU'LL GET IN NOW AND PLAY THE GAME

Campaign by Belgian Relief Commission During Week September 23-30. Commission Must Raise 5,000 Tons. Get in Touch With Your Local Red Cross and Give All You Can.

Five thousand tons of clothing for the destitute people of occupied Belgium and France!

This is the objective of a drive to be conducted by the American Red Cross at the request of Herbert C. Hoover, chairman of the Belgian Relief Commission, during the week beginning Monday, September 23. The clothing drive of the Red Cross last March brought in 5,000 tons of garments and it is estimated that at least as much more will be required to clothe the 10,000 people in the occupied territory during the coming winter.

As in the previous campaign, the clothing will be collected by the chapters of the Red Cross throughout the United States, each chapter getting its allotment from its division headquarters. There are thirteen of these divisions and each has already been apprised by National headquarters in Washington of the amount of clothing its chapters are expected to produce. Every kind of garment, for all ages and both sexes, is urgently needed. Garments of strong materials are wanted, as they will be subject to the hardest kind of wear. Flimsy garments, ballroom dresses, high-heeled slippers, silk hats, straw hats, and derbies, which were donated in large quantities in the last clothing campaign, will not be accepted. Such articles would be of no use.

This clothing can come from America only. Five thousand tons are needed to tide Belgium through the coming winter. Securing the clothing is a matter of life and death for this helpless, courageous population behind the German lines.

In Belgium it is impossible to buy shoes. There is no more leather of any description on the market. Every available substitute has been tried. For a time old belting from factories was used; and roofing paper, of which there happened to be a stock, was resorted to for resoling shoes. But the Germans, after having seized all the leather, requisitioned these substitutes also, and soon not a single yard of belting was left in any Belgian industrial establishment.

Now the Belgians fasten pieces of old rugs onto wooden soles and wear them for shoes.

And they make coats out of old blankets—and blankets out of anything.

Daily the ravages of tuberculosis throughout Belgium becomes more terrible. Deaths from this disease have increased 100 per cent and cases of external tuberculosis 1000 per cent. The doctors, in spite of their untiring devotion, can no longer cope with the rising tide of disease.

Today, two die where one died in peace times, while owing to under-nourishment the birth rate has been cut in half.

An American, writing from abroad about the conditions of this brave little country, says, "Poor Belgium! One-third of her people has starved to death; one-third has been carried away to work for Germany, and those who remain are left trying to decide between these two fates."

THE INSIDE STORY OF WHY SUGAR IS SCARCE

U. S. Food Administration Explains Facts With Regard to Reserve Stock; Geographical Complications in Sugar Distribution; Prospects for 1918-19 Sugar Crops; and the Shipping Situation.

OUR RESERVE STOCK.

Our sugar comes to us in definite seasonal cycles. The cane sugar of Cuba, Hawaii, Porto Rico, Philippines, and other minor sources, is exported to this country in the period from January to October. Although there is some available even as late as December, the amount is relatively small. From October to January we depend chiefly on our own domestic beet and cane crops, but it is not until November that the beet sugar is available in the eastern part of the country. To bridge the gap between the end of the arrival of cane sugar from outside of the country, and the arrival of beet sugar from the Western States, we depend normally on our refiners' reserve sugar from the Western States. Since our shortage during the latter part of last year our reserve stock has been in a depleted condition. Refiners now have only about 20,000 tons of raw cane sugar on hand, about 40 per cent of the normal reserve supply. Had our consumption in the past six months been reduced sufficiently, refiners' stock might now have been large enough to take care of our needs.

It is a striking fact that at no time this year have stocks been anywhere near those of the prewar years or of last year. At the latest date, August 10, stocks were still not much over one-half of last year's. This alone indicates the necessity for conservation.

GEOGRAPHICAL COMPLICATIONS IN SUGAR DISTRIBUTION.

An additional factor which complicates our sugar situation is the physical factor of the geographical extent of our country. It is possible that there may be an excess of sugar in the country as a whole, and at the same time severe shortages in particular localities far away from centers of distribution. Thus it has been stated "There will be considerable supplies of sugar available in the South and West, but because the gateway to the Atlantic seaboard through the Alleghenies and the Potomac Valley will be congested by the movement of munitions and war supplies for our overseas forces, it is extremely problematical whether any considerable tonnage can be moved East."

It is therefore not only necessary to make certain of sufficient supplies for the country taken as a unit, but it is also necessary to plan ahead with a view to having sugar available in all parts of the country even in the face of transportation difficulties. This of course involves building up of larger stocks than usual.

PROSPECTS FOR OUR 1918-19 SUGAR CROPS.

With the shortage of labor already universally existent in the United States owing to the demands of the war industries, and with the prospects of further inroads under the new 18 to 45 draft regulations, there is serious question in the minds of the producers of our domestic beet and sugar crops as to their ability to maintain the normal rate of production this next season.

It is most prudent to prepare for a reduced production of our domestic beet and cane crops. From our main sources of supply, Cuba particularly, and also Hawaii and Porto Rico, come reports of severe labor shortages and difficulties in obtaining necessary supplies and fertilizers. While the probability of reducing production in these places is not as great as in the continental United States, some considerable reduction is certain to come.

It would, therefore, be unwise to depend on the 1918-19 sugar crops to make up for any deficiency in our present supply. It is better to build up stocks to provide against further crop reduction.

THE SHIPPING SITUATION.

All of the foregoing considerations, however, would not bring about a shortage in normal times. Sugar could be brought from distant places if the demand was sufficient to warrant the financial outlay to obtain supplies. In fact, at this time, there is some 500,000 tons of sugar available in Java of last year's crop too far away to be moved, either to the United States or to the allies, which in ordinary times would certainly have been brought here to relieve the situation. The economic use of shipping facilities in accordance with our war program makes it advisable that we reduce our sugar consumption and employ shipping for more necessary purposes.

In brief, then, the entire sugar situation is an outgrowth of war conditions, and must be attacked as a war problem. We may expect it to be with us as a problem until the war ends, and this makes imperative the restrictive regulations on sugar consumption, although at times there may appear to be a surplus of sugar stocks in the country.

REPORT FOR AUGUST OF FOOD SAVING IN PUBLIC EATING PLACES

R. A. Parker, Director of Hotels, Restaurants and Bakeries for the Federal Food Administration for Texas, has submitted his report of savings on meat, wheat, sugar and wheat substitutes in public eating places of Texas for the month of August. The total of meals served shows 17,018,095 and the number of persons served 189,089, or approximately 4% of the population of Texas based on 4,700,000 men, women and children.

The increase in meals reported for August over July is two million. This increase can be attributed to a greater number of reports rather than an increase in business. More than 90% of the eating places of Texas are now sending their reports in to the administration on time.

The report shows that the public eating places have kept their sugar consumption below the two pounds per person per month and their wheat consumption below the six pounds per person. The report in general shows that the public eating places are living up to the requests of the Food Administration 100 per cent.

The total consumption of meat in the fifteen districts by patrons of public eating places for August was 2,228,577 pounds, or 11.84 pounds per person; 348,662 pounds of sugar, or 1.84 pounds per person; 1,058,063 pounds of wheat, or 5.59 pounds per person; and 814,153 pounds of wheat substitutes, or 4.3 pounds per person.

In this connection the Hotel and Restaurant Section announces that no sugar certificates will be issued to public eating places until monthly reports are in the offices of the County Food Administrators.

NEW FOOD DISTRICT CREATED ON BORDER.

An additional Federal Food District has been created by Federal Food Administrator Peden, with headquarters at Mission, Texas. The new district will be known as the Sixteenth, and the District Administrator is H. F. Bishop, formerly County Food Administrator for Hidalgo County. The counties and the County Administrators entering into the new unit are:

Brooks County, Richard Miller, Falcon, Texas; Cameron County, A. Wayne Wood, Brownsville, Texas; Hidalgo County, H. F. Bishop, Mission; Jim Hogg, W. T. Achlen, Hebbronville; Starr County, C. P. Alvarez, Rio Grande; Webb County, Joseph W. Kenney, Laredo; Willacy County, Wm. Turcotte, Sarita; and Zapata County, A. C. Taylor, Zapata.

The Sixteenth District was formerly the southern part of the Fifth, or San Antonio District, and the necessity for creating the new unit grows out of border conditions peculiar to this section which Administrator Peden decided should best be handled on the border. The administration of this district while under J. B. Carrington, District Administrator at San Antonio, was very efficient and commendatory of praise.

SUGAR SAVINGS SHOWN IN RETURNED CERTIFICATES.

Sugar certificates to the amount of 21,890 pounds have been returned to the Food Administration by hotels and restaurants of Texas covering July and August allotments, being unused parts of the allotment based on two pounds for every ninety meals. This amount represents an actual saving. A caterer may have a certificate for 100 pounds. He uses 70 pounds and sends in certificates for 30 pounds. The 30 pounds is an actual saving.

The bakeries of Texas have returned on the same basis sugar certificates representing 15,000 pounds, while public eating places and bakeries going out of business have returned 1,200 pounds. An interesting case of saving is that of the Van Noy Interstate Company, with 30 eating places in South Texas alone, which returned sugar certificates for use in their bakeries amounting to 4,710 pounds. This concern uses only syrups in bread making and for two months has not touched sugar in making breads.

TIN CONTAINERS SOON TO DISAPPEAR FROM SHELVES OF RETAILERS.

Packing of spaghetti and macaroni in cans will be discontinued after October 15 by consent of the manufacturers of alimentary pastes.

Tea and coffee will be sold only in non-metal containers, as soon as present stocks of tin containers are used up. This action grows out of the voluntary act of the larger distributors of these two commodities.

Kraut, so far as possible, will be sold in bulk packages so as to conserve the use of small tins. It is somewhat late for the 1918 pack, but the 1919 pack will be handled in this way entirely.

Manufacturers of syrups and molasses will aid on conserving the use of tin containers by adopting three standard sized cans. All small and odd sizes will be discontinued.

RULES GOVERNING SALE OF FLOUR TO FARMERS.

Restrictions covering the amount of flour that can be sold a consumer by a retailer at one time have been lifted by the Revised Wheat Flour Regulations, provided that not more than a sixty days' supply is bought; however, it is necessary for the consumer to purchase 20% substitutes at the time the flour is purchased.

In case of the farmer who has his own home-grown substitutes, it is not necessary to sell substitutes at the time flour is purchased, provided the farmer makes a written statement to the merchant at the time of purchase that he has these substitutes on hand and will use the same.

WAR PROGRAM FOR ALL PUBLIC EATING PLACES IN AMERICA

ANNOUNCEMENT MADE BY FOOD ADMINISTRATOR.

General Orders Issued Covering Every Phase of Cooking Service and Conserving Foodstuffs.

The "War Program for Public Eating Places of America" has been announced by the United States Food Administration. It is released simultaneously over the United States, and the rules became enforceable October 21, 1918. The initial issue of the pamphlet, consisting of twelve pages, has been struck off in 250,000 booklets and shipments were made from Washington to the forty-eight cities of the United States where the Federal Food Administrators have their headquarters.

Up to the announcement of a definite set of general rules governing public eating places, the program was somewhat nebulous and its application over the nation did not indicate so much a lack of uniformity as a variance in interpretation. The new rules embody twelve general orders. A failure to comply with any of the orders will be regarded as a wasteful practice forbidden by section 4 of the Food Control Act of August 10, 1917.

Conservation Necessary.

A clearly defined conservation program in public eating places is necessary in view of the fact that enormous quantities of food are consumed in these places and various conditions are leading the public to patronize public eating places more than heretofore. It is estimated that nearly 5,000,000 people eat at the public eating places of America—hotels, restaurants, boarding houses, clubs, dining cars and so forth. The food consumption in these places is larger than in the average homes.

The program in many particulars is more strict than last year. It does not embody rationing. The plan is simply an appeal to the intelligence in public eating places of America to work out for themselves the means and manner of saving.

The twelve general orders which will govern all public eating places in food conservation after October 21 are as follows:

20 Per Cent Substitute.

General Order No. 1: No public eating place shall serve or permit to be served any bread or other bakery products which does not contain at least 20 per cent of wheat flour substitute, nor shall it serve or permit to be served to any one person at any one time more than two ounces of this bread, known as victory bread, or if no victory bread is served, more than four ounces of other breads (such as corn bread, muffin, Boston brown bread, etc.). Bread served at boarding camps, rye bread containing 50 per cent or more of pure rye flour and sandwiches are excepted.

General Order No. 2: No public eating place shall serve or permit to be served bread or toast as a garniture or under meat.

General Order No. 3: No public eating place shall allow any bread to be brought to the table until after the first course is served.

General Order No. 4: No public eating place shall serve or permit to be served to one patron at any one meal more than one kind of meat. For the purpose of this rule meat shall be considered as including beef, mutton, pork, poultry and any-by product thereof.

General Order No. 5: No public eating place shall serve or permit to be served any bacon as a garniture.

One-Half Ounce Butter.

General Order No. 6: No public eating place shall serve or permit to be served to any one person at any one meal more than one-half ounce of butter.

General Order No. 7: No public eating place shall serve or permit to be served to any one person at any one meal more than one-half ounce of cheddar, commonly called American cheese.

General Order No. 8: No public eating place shall use or permit the use of the sugar bowl on the table or lunch counter. Nor shall any public eating place serve sugar or permit it to be served unless the guest so requests, and in no event shall the amount served to any one person at any one meal exceed one teaspoonful of its equivalent.

General Order No. 9: No public eating place shall use or permit the use of an amount of sugar in excess of two pounds for every ninety meals served, including uses of sugar on the table and in cooking, excepting such sugar as may be allotted to hotels holding a bakery license. No sugar allotted for this special purpose shall be used for any other purpose.

Small Not Burn Food.

General Order No. 10: No public eating place shall burn any food or permit any food to be burned, and all waste shall be saved to feed animals or reduced to obtain fats.

General Order No. 11: No public eating place shall display or permit to be displayed food on its premises in any such manner as may cause its deterioration so that it can not be used for human consumption.

General Order No. 12: No public eating place shall serve or permit to be served what is known as double cream, or crème de luxe, and in any event no cream containing over 20 per cent of butter fat shall be served.

The general plan includes among others the following interpretations:

Sparing Use of Cereals.

One portion of meat at a meal.

Service of as few fried dishes as possible, to save fats.

One teaspoonful of sugar to a patron at one meal.

No candies after meals.

No icing made with cane or beet sugar on cakes.

Wide use of vegetables and vegetarian meals.

Because of shipping space to carry coffee, economize in its use.

Discontinuance of service of cheddar cheese as garniture.

Ice to be served sparingly.

Elimination of fourth meal.

Elimination of meats at suppers and use of substitutes.

Simple fare for lunches and banquets.

Reduction in service plate and ware in public eating places and use of one plate instead of side dishes.

Standard menu cards, with foods set forth in English.

Cafeteria system recommended as money, time and labor saver.

Use of local and seasonable supplies.

All waste foods to be saved to feed animals or for reduction to obtain fats.

No food to be burned.

Prices to be adjusted to meet reduction in quantity of food served.

Hotel, restaurant and public eating places are reminded in this connection of Herbert Hoover's pledge to the allies:

"I have taken the attitude for the

United States that whatever the war food program of the allies requires of us, we

are prepared to meet; that the world food conference will consider whether or

not we have supplies which are needed to

find them; that their sole anxiety must

be to maintain the health and strength of

their people and conserve shipping to

transport the American army; that we

by the economy of our people,
